ENVIRONMENTAL ENGINEERING FAQs

WHO IS ELIGIBLE TO APPLY?

Spring 2017: All first year Cockrell Engineering Students, second year students will still have access to the internal transfer applications but the top priority admits will be first years. 
Fall 2017: First time in college, first year students. We do not anticipate accepting transfer students, internal or external in fall 2017.
Spring 2018 Forward: All eligible internal, external and first year students as space allows.

HOW CAN I TAKE EVE 302?

Only students currently enrolled in the Environmental Engineering program are able to register for EVE 302. Students who are accepted in spring 2017 will work with the advising offices to change their schedules to EVE 302 in January 2017.

WHAT SHOULD I DO IF I AM NOT ELIGIBLE TO TRANSFER INTO EVE?

Civil engineering is the birthplace of environmental engineering, students will still be able to take technical coursework in environmental engineering as civil engineers. For years our graduates have been extremely successful environmental engineers with our civil engineering bachelor’s degree. Our environmental engineering faculty serve both civil and environmental engineering students and are always open to advising no matter what your official major.

WHAT ARE THE REQUIREMENTS FOR TRANSFERRING?

All Cockrell Engineering students have the same application via the Engineering Student Services (ESS) offices. There is no essay/resume/references needed at this time. First year students must be enrolled in at least 14 hours, have a minimum 3.0 GPA, and M 408C and CH 301 completed at the end of fall. These are the minimum requirements to be considered for enrollment. The application and additional information can be found here: http://www.engr.utexas.edu/undergraduate/admissions/changeofmajor

WHAT ABOUT MY CE 301 OR ARE 102 CREDIT?

At this time CE 301 and ARE 102 will not count towards any EVE degree requirements.
