

Senior or Graduate Student with Class Work in Hydrology

PART TIME – Temporary Work – April through June, 2012

AW Blair Engineering has two part-time temporary positions for senior or graduate level students enrolled at the University of Texas at Austin in Civil Engineering or Geological Sciences. The applicants must have completed or be enrolled in course work regarding hydrologic systems, and must have a good knowledge of MS Excel and the ability use various governmental web sites (such as usgs.gov or usbr.gov) to download hydrologic data and organize the data into Excel or other formats. One of the two positions requires experience with HEC-RAS.

Hourly rates for the positions range from \$15 to \$25 per hour depending on skills and proficiency. Hours are flexible but applicant must be able to meet with Dr. Blair or staff at least one hour twice a week to receive work assignments and turn in completed assignments.

Interested students should send a resume to awblair@awblair.com and include the times during the week the student is able to meet to discuss work assignments.

AW Blair Engineering is located at 2906 Medical Arts Road in Austin, Texas just north of the UT Law School and the University Coop East bookstore. Applications will only be accepted by email.
