ArcGIS access on UC Campus

ArcGIS Version 10.4.1 can be accessed on computers in Erskine 248 (Level 2) or 001 (Level 0)
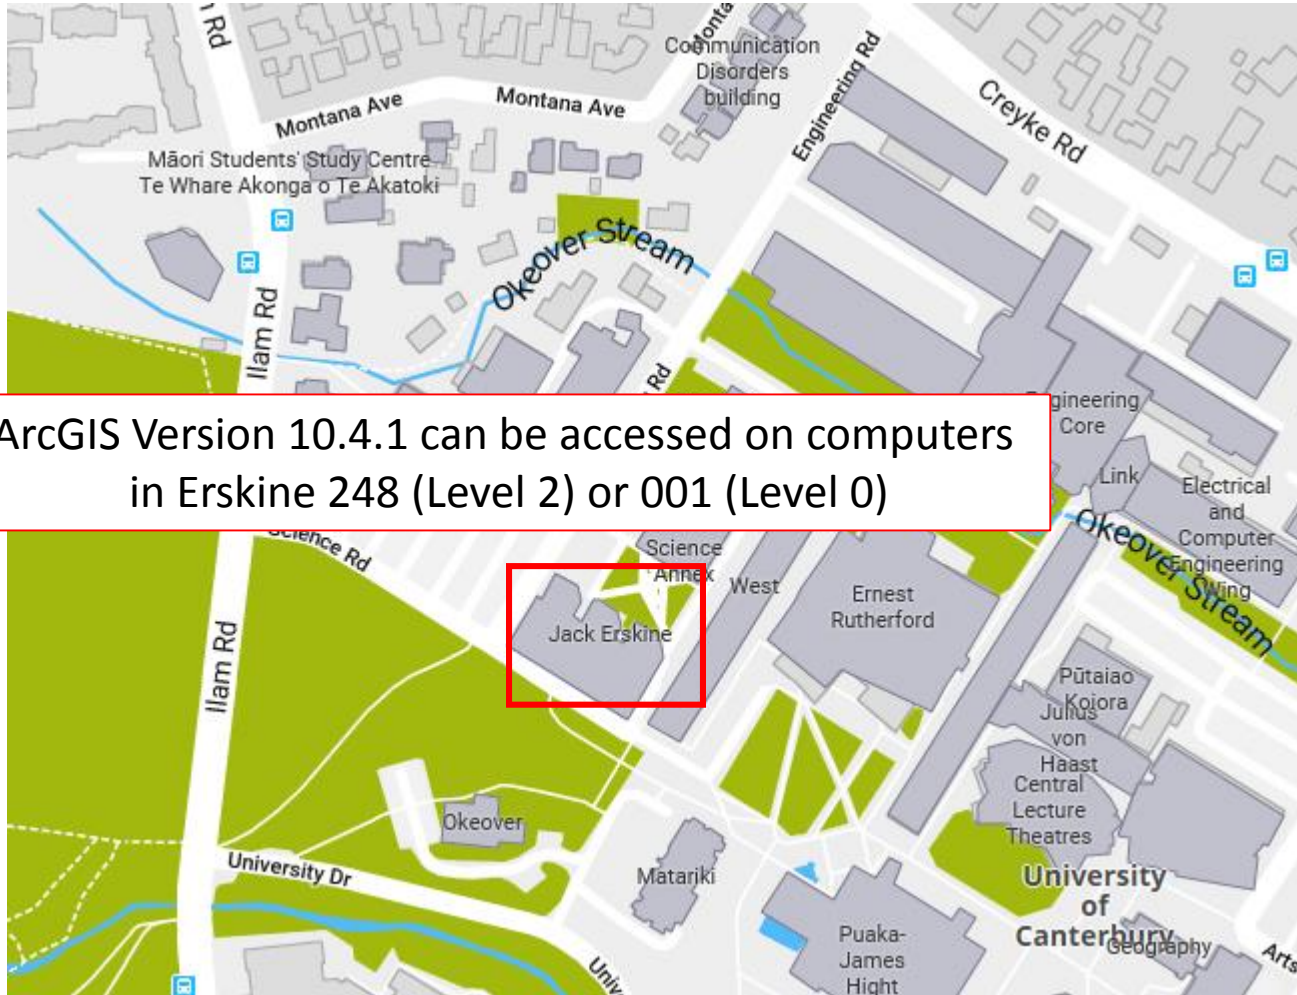

Email from John Thyne

Hi David (david.maidment@canterbury.ac.nz),

Here's an ArcGIS for Desktop (ArcMap) 1 year authorization code: EVA………….. and download instructions, as requested on your behalf for WATR404/WATR604 by David Maidment.

This authorization code is for ArcGIS for Desktop ArcMap and not ArcPro, so please ensure you download the correct one. It is supplied under UC's site license at no charge to you, which means that it is your responsibility to install, and abide by the **Terms of Use**. Installation is straight forward providing you meet the system requirements and follow the instructions.

After installation, should you want to move it to another computer OR reinstall your operating system/software, then you must first de-authorize the license using ArcGIS Administrator (Support Operations> Deauthorize…). You should also keep a copy of the install files as you can't return to the download link with this code.

Regards,
John Thyne

Instructions (revised)

Here's an ArcGIS 1-year authorization number: EVA* and download instructions.

It is supplied under UC's site license at no charge to you, which means that it is your responsibility to install, and abide by the **Terms of Use**. Installation is straight forward providing you meet the system requirements and follow the instructions.

First, check that your computer has the required system requirements.

Apple Mac users: ArcGIS for Desktop runs natively on Windows. It can be installed on Apple computers by using BootCamp, Parallels, or VMWare. Esri don't provide instructions, but this article ArcGIS Pro in Mac OS X is helpful if you ignore the Pro.

Then go to http://www.esri.com/StudentEdition and

Sign-up for a FREE Esri Account, or login if you already have one.
Enter the authorization number and click **Activate ArcGIS**.
Select a version to download – UC computers are currently using ArcGIS 10.4.1.
Follow the steps to download and install ArcGIS Desktop (**ArcMap**) – the instructions will be sent to your email. (FYI: ArcGIS Pro is not covered by this 1-year number).
>	When you extract the install files, automatically launch the setup.
>	When prompted to 'Select the software product…' choose **Advanced (ArcInfo) Single Use**.
>	Accept the default prompts, enter your personal details, accept the default "I do not wish to authorize any extensions at this time" as they are authorized automatically.
>	Enter your authorization number: EVA*.
After installation, should you want to move the software to another computer OR reinstall your operating system/software, you must first de-authorize the license using ArcGIS Administrator (Support Operations> Deauthorize…).

PS: Good references for using ArcGIS ArcMap are the Quick tour in the ArcGIS Help and the ArcGIS YouTube channel.

- o   ArcGIS Pro requires Microsoft .NET Framework 4.5.1 and Microsoft Internet Explorer version 10 or newer. Before running the installation program for ArcGIS Pro, ensure that your machine meets these prerequisites. The Install Guide for ArcGIS Pro provides an overview of installing and setting up ArcGIS Pro and links to detailed resources, including system requirements.

- o   ArcMap requires Microsoft .NET Framework 4.5 and Microsoft Internet Explorer version 9 or newer. Before running the installation program for ArcMap, ensure that your machine meets these prerequisites. The install guide provides an overview of installing and setting up ArcMap and links to detailed resources, including system requirements.

4.   Install and authorize ArcGIS for Desktop

- o   Select a destination folder to extract the install files to. If you choose, you can automatically launch the setup after the files have been extracted.

- o   When prompted, select **ArcGIS for Desktop Advanced Single Use**.

- o   When prompted, accept the default, **I do not wish to authorize any extensions** at this time. The extensions will be authorized automatically.

If you run into this screen,you'll have to get an Administrator login to complete the installation
