

## **Job Opportunities with RPS**

**Please contact Ernest To directly**

Dear Dr. Maidment:

Hope you are doing well. RPS is looking to recruit some new engineers/GIS specialists for our Austin office. I would like to ask if there are students in your research team or your classes that may fit the following categories:

1. PE-licensed engineer with a few years' experience in Hydrologic and Hydraulic modeling (HEC-RAS, HEC-HMS). The engineer will be performing floodplain modeling and other water resources type work.
2. An experienced GIS person who can be a good technical planner or GIS guru.
3. A fresh EIT/undergrad (finishing in May) with concentration in environmental water resources and strong motivation to learn.

If you can think of anyone please let me know. RPS is looking to recruit and we'll be interested in talking to potential candidates.

Thank you for your kind attention.

Ernest
